

Business Intelligence

Make informed, data-driven decisions with a complete view of business performance metrics with our built-in business intelligence and powerful analytics tools.

CUSTOMERS WHO TRUST CODEOBJECTS

Better insight leads to better decisions, better business and an overall better bottom line. Our business intelligence solution is fully integrated with the CodeObjects Core Suite, and provides rich data visualization, exploration and discovery. Pre-built measures, dimensions and key performance indicators make it easier to understand the data.

CodeObjects business intelligence reveals actionable insights to help you see underlying trends, identify potential risks, and find opportunities for competitive differentiation and growth.

Benefits All Property and Casualty Functions

Sales Identify agent productivity, retention and renewal rates, and profitability levels by product, region and territory.

Underwriting Identify trends for premiums and losses. Monitor risk trends by classification and distribution. Optimize productivity.

Claims Manage adjuster performance, improve fraud detection, vendor management, and drill down into loss-expense ratios.

Product Perform profitability analyses, ensure adequate risk pricing, be more competitive with consensus data.

Finance & Accounting Perform analytics for reserve, premium, profit and accurate loss reserving.

Enable Data-Driven Decisions

Standard and custom reports and dashboards reveal business trends and opportunities for growth. Teams can adjust underwriting rules, policies or procedures based on real-time data.

Proactive Intelligence

Real-time alerts, dashboards and reports reveal trends before they become a problem. Intelligence gives carriers the information they need to adjust strategies and maximize success.

Gain Competitive Advantage

Deep analytics reveal potential risk, competitive factors and consumer preferences. Build effective strategies and quickly implement changes that are informed by data.

DESIGNED TO HELP YOUR TEAM MAKE AGILE, DATA-INFORMED DECISIONS

CodeObjects business intelligence enables you to better understand how your business is performing at a granular level. Measure your business performance against expectations and project probable outcomes. Data-driven decisions allow you to course correct along the way to achieve the best business result.
