

Integration with Third-Party Services

Pre-built integrations with leading insurance industry vendors takes the burden of integration off your hands. Easily select from our library of services, or let us integrate your preferred vendors.

CUSTOMERS WHO TRUST CODEOBJECTS

Carriers need access to essential third party services and information. With pre-built integration services to leading third party vendors and information providers, you access a wide variety of real-time services and data. CodeObjects maintains these integrations, so you don't have to. As your needs change, new services can be easily added or deleted. For custom integrations, the CodeObjects Core Suite offers web service capabilities, templates and support for integration with service providers or trading partners that are not in our current library.

Because all integrations are pre-built, tested and maintained by CodeObjects, the implementation is efficient and less time consuming.

Effective, Integrated, Flexible Choice of Key Services

Lower Maintenance Our complete library of pre-built integrations has gives you access to the standard services you need. Our hosted software is always up to date, offering you the latest from the vendors you have come to trust.

Eliminate Implementation Headaches CodeObjects integrates and maintains all the integrations. Pre-built code and best practices make adding, swapping or deleting a service simple and efficient.

Large Library of Services including address services, e-signature, agency download services, payment solutions, accounting software, security, authentication and authorization, and third party data sources.

Faster Time to Market

All integrated services are designed to be quick to implement and easy to roll out. Carriers have the ability to change service providers as necessary, and without downtime.

Flexibility Out-of-the-Box

Pre-built best practices, technology interfaces and implementation and testing methodologies reduce the complexity and increase speed of implementation.

Configuration

For services that are not included in the CodeObjects library, integration is simple, supported by CodeObjects and based on standard web services.

END-TO-END OPTIONS

CodeObjects offers integrations for each phase of the insurance lifecycle, from quote through renewal. With prebuilt integrations, implementation of services can be reduced to a few hours or days. CodeObjects manages the entire process so you can stay focused on your business.

Address Services

Address cleansing services ensure that carriers are working with clean and accurate location data.

ECM Solutions

Interfaces to leading Enterprise Content Management solutions, including document generation services, make document management efficient and accurate. Document templates that are linked to data files simplify insurance processing.

Payment Systems

Seamlessly integrate with leading payment processing vendors and gain access to recommended vendors that specialize in insurance.

Accounting

Integrations with PeopleSoft, Diamond and other leading accounting systems can provide automatic data feeds for streamlined accounting.

Security and Authentication

CodeObjects integrates with your centralized authentication and authorization services, business rules and policies.

Third-Party Data

CodeObjects is fully integrated with all leading thirdparty data solutions used by underwriters, claims representatives or other carrier team members.

Better systems. Better policies. Better business.

CodeObjects is a state-of-the-art, cloud-based Property & Casualty Insurance platform. With CodeObjects, carriers have access to better systems, can write better policies and deliver better business results. Our solutions are purpose-built for, and fully configurable by business users. We put the power to change, update or launch new products in the hands of these users, with minimal reliance on IT. CodeObjects gives carriers the flexibility and speed they need to respond to change, reduce risk and grow.
