

Payment Processing Services

End-to-end payment process covers both incoming and outgoing payments. Fully integrated with BillingEnterprise, our payment processing service gives carriers complete control over their payment activities.

CUSTOMERS WHO TRUST CODEOBJECTS

Payment processing, integrated with billing services, is an essential part of the P&C business. BillingEnterprise is designed to work with our payment processing service. Both are easy to launch, configure, adjust and manage through simple configuration settings.

Effective payment processing reduces expenses, ensures maximum productivity and a better bottom line.

Effective, Integrated, Flexible Payment Processing

Biling Integration Support for all forms of incoming and outgoing payments, fully integrated with billing capabilities of the platform.

Configurable Graphical Interface Designed for the business user, our payment processing system is easily configurable without the help IT or programming.

Rapid Installation Flexible, configurable billing options, types, plans and rules for all products and states make it fast and easy to install.

Flexible Payment Options

Multiple payment types including credit cards, bank transfers, cash and agency sweep is supported.

Payment Collections

Support for one-time, automatic recurring, Lockbox for checks is supported. Automatic handling of late payments, pending cancellation notices, non-pay and equity cancellation.

Efficient Payment Processing

Automatically apply payments to policies. Role-based management of errors such as overpayment, underpayment, bounced checks or disputed credit items.

BILLING ENTERPRISE INTEGRATION

As an optional service, CodeObjects payment processing is fully integrated with BillingEnterprise, the billing engine within the CodeObjects Core Suite. This integration enables all payment activity to be automatically associated with a policy and an invoice, for streamlined business operations. Simple user interfaces, designed for business people, enable easy configuration of payment and billing systems for maximum flexibility and performance.
